## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Nguyen (6,429,629).

Nguyen discloses a switch mode power supplies in Figs. 2A-3J. An input voltage source (BT1), output current independent of output voltage (VOUT), switching arrangement (Q5 and Q6), transformer (T1) has two windings, pulse width modulator (26), capacitor filter (C1) and third switch (Q1). Figs. 3A-3J teach the operation in any four voltage-current quadrants.

3. Claims 1 - 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Dinger (4,283,667).

Dinger discloses a motor field exciter in Figs. 1-4. An input voltage source (L1, L2 and L3), output current independent of output voltage (10), switching arrangement (124, 126, 126 and 130), transformer (20) has two windings (10 and 18), pulse width modulator (27), capacitor filter (C1) and third switch (Q1). The power converter shown in Fig. 3 operates in all four voltage current quadrants (Col. 8, lines 5-14).

***Response to Arguments***

4. Applicant's arguments filed 4/21/05 have been fully considered but they are not persuasive. Applicant argues that Nguyen patent does not teach operate in all four voltage current quadrants. Claim 18 states that it operates in any one of four voltage current quadrants that means the Nguyen patent would read on it since it operates in one of the four voltage current quadrants.
5. Applicant's arguments with respect to claims 1-17 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
